Abstract (en)  
There is disclosed a seat comprising a supporting structure (4) and at least one seating unit (3), wherein the seating unit (3) is made of plastic material and comprises a structural element (8) defined by a hollow tubular element made of plastic material in one piece with the seating unit (3) and extending along at least part of the perimeter of the seating unit (3). The structural element (8) is also produced by a gas-assist process to inject a gas into the plastic material forming the seating unit (3).
