Abstract (en)
The object of the present invention is an assembly system for rebar structures that allows placing and supporting the structure ties (2) at the correct distances as per specifications and means (5) for indicating the position in which the ties should be placed and transporting the conformed structure in a simple manner to any location for its final assembly. The assembly system comprises two horizontal platforms (1) that can be separated or brought together depending on the size of the ties (2).
