Abstract (en)

A system and method for deal-making in a multiplayer game-of-chance tournament are described. The system and method are applicable to poker, blackjack, mah-jongg, video slots, and other betting games of chance at online and live casinos. The system includes a graphical interface which depicts the game-of-chance and a deal-making interface. The deal-making interface allows players to negotiate the distribution of a divisible prize (a prize pool split). The graphical interface may also include a chat window, displayed along with the deal-making interface, for allowing communication among players.
