Abstract (en)

[origin: WO2007014647A1] The invention relates to a pressure device (5) for a clamping system. Said pressure device (5) is coupled to a tightener (9) of the clamping system, and comprises a pressure arm (11) which is actively connected to said tightener (9) with one end (12) thereof and is provided with an oblong hole (14) on the opposing free end (13) thereof, a fixing rod (15) for a clamping head (10) being arranged in said hole in a rotatable and longitudinally mobile manner. The inventive pressure device also comprises a locking element which fixes the angle between the clamping head (10) and the pressure arm (11) and comprises a locking plate (16) and a locking journal (17).
