Abstract (en)

[origin: WO2007017608A1] The invention relates to sealed flexible packaging for food products, which is intended to be heated for cooking purposes or defrosted. The inventive packaging comprises two heat-sealable, stacked composite sheets. According to the invention, each composite sheet (4, 5) comprises at least one heat-sealable, high-temperature-resistant binding sheet (17) between an aluminium sheet (15) and a high-temperature-resistant, heat-sealable plastic sheet (16).
