Abstract (en)  
[origin: WO2007021787A1] A child-resistant container (10,11) which holds at least one item. The container (10,11) includes a housing (18) having upper and lower walls and at least one open side between the upper and lower walls. The container (10,11) also includes a tray (20,20') having a drawer slideably positioned in the tray. The drawer is for containing the item. The tray is pivotably connected to the housing (18) at a pivot joint for movement between a first position in which the tray and the drawer are contained in the housing for preventing access to the item and a second position in which the tray (20,20') extends through the open side of the housing for exposing the drawer and the item.
