Abstract (en)

[origin: WO2007012763A1] The invention concerns a novel block copolymer comprising a block having a low critical solubility temperature (LCST). The invention also concerns formulations comprising the copolymer, and the use of the copolymer or formulations for vectorizing an active principle. The copolymer and the formulations can in particular be used in the field of cosmetics, pharmacology, in the fields of household care or in the field of surface coatings.
