Abstract (en)
[origin: WO2007014862A1] The invention relates to a plug-in connection in a motor vehicle having a plug (11) and a mating plug (13). Until now, when fitting a wiper motor of a windscreen wiper system, the connection of the electrical lines has been a separate working step. The invention has the object of eliminating this working step. Therefore, in the plug-in connection according to the invention, the plug (11) and the mating plug (13) can automatically be plugged together when two components are assembled.
