Abstract (en)
The tub has a peripheral gutter (1) molded around the tub and located at a base of an elevated edge (2) that is molded around the tub. The edge blocks water coming all around a shower compartment and the peripheral gutter collects the water around the tub when a user takes a shower. Converging gutters (3) are perpendicular to the peripheral gutter. The gutters (3) block the water coming out from the compartment and act as drainage channels for draining the water, collected in the gutter (1), towards the interior of the tub. The gutters (3) are inclined towards the interior of a receiver.

Abstract (fr)
L'invention concerne une cabine de douche comportant un bac et des parois. Le bac (1) comporte un rebord périphérique (20) qui remonte le long des faces extérieures (44) des parois (40), et un réseau de gouttières situé vers l'intérieur du bac (1) par rapport au rebord (20), ce rebord (20) étant apte à bloquer l'eau suintant le long de ces faces extérieures (44), et le réseau de gouttières étant apte à récolter cette eau et à la drainer vers l'intérieur du bac (1).
