Abstract (en)  
[origin: EP1914049A1] The flatbed stamping machine, to stamp or emboss flat paper/cardboard sheets, has a conveyor (10) to move the sheets through the stamping stations. The first stamping station (3) embosses a film on to the sheets and a second station (3') stamps out or embosses the film-covered sheet. The component parts of the machine are independent modules, with their own drives interconnected for the transfer of data and/or control signals.
