Abstract (en)

[origin: EP1914340A1] The present invention relates to a clothes drier 1 comprising a drain circuit, a seat for receiving an extractable container 2 and an engaging device 5. The engaging device 5 ensures engagement between the terminal portion 4 of the drain circuit and an inlet 3 provided on the container 2 so as to discharge water from the clothes drier 1 into the container 2 and comprises at least one first member 9 pivotably mounted on a pivot P which is fixed with respect to the terminal portion 4 of the drain circuit.
