Abstract (en)
[origin: EP1914358A2] The aid (1) has a profile body (2) with a side piece (3) and another side piece (4) that lies opposite to the side piece (3). The piece (4) has attachments (6, 7) insertable into a heat damping body, and a section (5) connects the pieces. The section forms a contact surface for an end area section of the damping body. A part of the attachments has a cross section that narrows from the section (5) till to its free end such that an area (9) from the section (5) is provided with a reduced narrow contour and an area (10) is provided with a thicker, sharp edged narrow contour.
