Abstract (en)  
[origin: EP1914398A1] The exhaust gas rear silencer (1) has two silencers that are separated from each other, where exhaust gas flows through silencers, which have an exhaust gas inlet and exhaust gas outlet. Two exhaust guide pipes (3, 6) are provided, where the exhaust gas guide pipe (6) has a discharge opening (10) within the exhaust gas rear silencer (1) for forcibly discharging exhaust gas from the exhaust gas guide pipe (3) with a closed exhaust gas blocking flap (4), where the exhaust gases of an internal-combustion engine directly flows into the discharge opening.
