Abstract (en)

The assembly has a sleeve-shaped base body (HU) including a central longitudinal axis (ML), and a light extension body (FO) at a front side of the base body. An electronic switch is energized from a battery and provided within the base body. The base body possess an opening (OH) at the front side and surrounds an insertion component (EZ). The component contains the battery, the electronic switch and a contact arrangement for an electrical connection of the battery with the electronic switch. A light source is operated by the switch with a clock frequency that is larger than 80 Hertz.

Abstract (de)

Für eine batteriebetriebene elektrische Kerze wird ein vorteilhafter konstruktiver Aufbau mit einem mehrteiligen Einsatzkörper (EK) innerhalb eines hülsenförmigen Grundkörpers (HU) beschrieben, wobei der Einsatzkörper (EK) mehrere Komponenten, wie eine elektronische Schaltung mit einer Lichtquelle (LED), eine Batterie (BA), und Kontaktkörper aufnimmt.
