Abstract (en)
The present invention relates to an arrangement for a grenade comprising a shell (4) and a cartridge case (2) with a first section (6) for housing a propellant and a second section (8) in which said shell is fitted by means of a releasable coupling (18). An intermediate section (10) between said first and second sections (6, 8) is provided with brake indications (12) forming a number of four connecting bridges (14) of case material configured to give away on firing off of the grenade.
