Abstract (en)  
[origin: EP1914839A2] The device (1) has a clamping contact area (18) that is open to a broad side (9) of a housing and to a front side, and clamping contacts (10, 10') which are covered by clamp covering parts (22, 22') pivotably connected with the housing. The part has connection surface (24, 24') with connection holes (26, 26') corresponding to number of line connections. Guiding unit is formed at each connection hole (26, 26') for the connections, and has two side surfaces (29, 29'), which covers the contacts laterally in a direction of the broad side.
