Abstract (en)
[origin: WO2007020005A2] The invention relates to a laboratory bench (1) with a bench top (4) comprising a recess (5) in the field of vision of the working person. Said recess allows an information support (3), positioned in a retracted rest position under the bench top (4), to pass through to a position above the bench top (4) in which the person has visual contact to the information support. The information support (3) can be lifted and lowered by a motor in a controlled manner.
