Abstract (en)

[origin: WO2006131667A2] The invention concerns an assembly designed to be fixed on a container holding a fluid product, said assembly comprising a fixing ring (1) adapted to secure a dispensing member (3), such as a pump or a valve, on the neck of the container, and a seal (2) designed to be interposed between the fixing ring (1) and said container neck, said seal (2) being pre-mounted in close-fitting engagement in the fixing ring (1) so as to maintain said seal (2) in stressed state in said ring (1) before and after fixing said assembly on said container neck.
