Abstract (en)
[origin: WO2007017316A1] Known burner devices for operating a fuel that is liquid at room temperature, especially a vegetable oil, comprise an evaporator system (11) for evaporating the liquid fuel, and a nozzle (25) for ejecting and for igniting the evaporated fuel under the effect of flame. The aim of the invention is to improve reliability of operation of such a burner. For this purpose, the burner comprises a heat conducting sheet (9) which at least partially surrounds the evaporator system (11).
