Abstract (en)
[origin: DE202005014184U1] The system has communication connections that are set up between remote control cameras (13a, 13b) and a control centre (19) for transfer of image data at the centre. A preview-channel (37a) is provided for each camera, where preview-image data is transferable over a channel irrespective of the current acceptance or live transfer to the centre (19). A control unit (33) controls the cameras based on the preview-image data.
