Abstract (en)
[origin: EP1916108A2] The plate (10) has a plate-like base body (11). The printing plate has a forward-moving end and a trailing end provided after a cylinder of a printing machine. The ends are bent symmetrically with respect to side of the base body and include two identical angles. The forward moving end (12) and the trailing end (13) are arranged with the side of the base at an angle between 85 and 90deg. The forward moving end and the trailing end is arranged with the side of the base at angle of about 87deg. The forward moving end and trailing end are approximately the same lengths of between 3 and 12 mm. An independent claim is included for a rubber plate.
