Abstract (en)

[origin: WO2007022821A1] The invention relates to an apparatus, in particular a high-power slicing device, for slicing food products such as sausage, cheese, ham and the like, having a product supply means which supplies a product to be sliced to a cutting level (11) in which a cutting blade moves, in particular in a rotating manner, such that it adjoins a cutting edge which forms the end of the product supply means, wherein a termination region (17, 19), which includes the cutting edge, of the product supply means is provided with means (21, 23) which cause at least one product-carrying supporting and/or bearing surface (25, 27) of the termination region (17, 19) to vibrate.
