Abstract (en)
[origin: WO2006102945A1] The invention relates to a packaging, in particular a folding box for cigarettes, wherein the cover (12) is pivotably mounted on part of the box (14). A collar (19), which comprises a separate section, is arranged in the inside of the box part (14) and at least partially protrudes from the upper open box part (14). Said packaging, which is rectangular in the cross-section thereof, comprises a large front side (15) and rear side (16), in addition to two smaller sides (17, 18) having a smaller width. A linear joint (13) which is used to pivot the connection of the cover (12) with the box part (14) is arranged in the region of one of the two smaller sides (17, 18). According to the invention, on section, wherein the cover closing edge (42) and the box closing edge (43) adjoin when the cover is closed (12), is not covered by areas of the collar (19) but by a separate section (41) which is secured to the inner side of the rear wall of the box (23) and protrudes towards the top from the box part (14).
