Abstract (en)  
[origin: WO2007008375A2] A dispensing assembly is provided for a container (22, 222, 222B, 22C) of fluent material. A hand-operable dispenser cartridge (24, 224, 224B, 24C) is adapted to be mounted to the container (22, 222, 222B, 22C). An actuator (42, 242, 242B, 42C), which may include a nozzle or spout (45, 245), is mounted on the cartridge (24, 224, 224B, 24C). A locking sleeve (76, 76A, 276, 276B, 76C) is mounted around the cartridge (24, 224, 224B, 24C) and has an upper abutment edge (81/82; 81A/82A; 281/282; 281B/282B; 81C/82C) and a recess (91/92; 91A/92A; 291/292; 291A/292B; 91C/92C). The locking sleeve (76, 76A, 276, 276B, 76C) can be rotated between a first rotated position preventing actuation of the dispensing assembly and a second rotated position permitting actuation of the dispensing assembly.
