Abstract (en)
[origin: WO2007020160A1] The invention relates to a cooking appliance, in particular, a cooking appliance which is mounted in an elevated manner, which comprises at least one muffle (5) which defines the cooking space (3), whereby the muffle opening thereof (S) is surrounded by a muffle frame, a door (7) which is used to close said muffle opening and a drive device (9, 10) which is used to actuate the door and which is controlled by a control device (13). The drive device can be controlled by the control device such that the door can be actuated independently from the charge.
