Abstract (en)

The applicator (3) has a rod (4) with a longitudinal axis (X) and including an elastically deformable flexible portion (20) that bends during application and/or whirling. An application element (5) is fixed to the flexible portion of the rod and has a twisted core and bristles (11) transversally extending to the axis of the rod. The portion is adjacent to an end (4a) of the rod and includes a housing in which the application element is inserted. The rod has a rigid proximal part whose length is larger than that of a rigid distal part. The portion is overmolded on a rigid part of the rod. An independent claim is also included for a method for cosmetic treatment using an applicator.

Abstract (fr)

La présente invention concerne un applicateur (3) pour appliquer un produit (P) sur les fibres kératiniques, notamment les cils ou les sourcils, comportant : une tige (4) ayant un axe longitudinal (X) et comportant au moins une portion flexible (20) élastiquement déformable, pouvant fléchir lors de l'application et/ou à l'essorage, un élément d'application (5) fixé à la tige (4), comportant des poils (11) ou dents s'étendant transversalement à l'axe longitudinal de la tige.
