Abstract (en)  
[origin: EP1917888A1] The dispenser has compartments for accepting sheet material i.e. brochures, where the compartments are formed by module components joined together and released again. The module components include a tray for accommodating sheet material, a front plate (34) and a partition wall (2). The tray consists of a rear wall (4), two side walls (16) and an end wall forming at lower end. The tray is provided with longitudinal slots in a region of rear wall or the attachment of the partition wall. The partition wall has hooks inserted into the longitudinal slots.
