Abstract (en)

[origin: EP1918035A1] Tension levelling system (10) of a metal strip (14) comprising at least a couple of levelling rolls (50) of which at least one having an internal cavity (55) elastically expandable through insertion into the same of a pressurized fluid. The tension levelling system (10) comprises sealing means suitable to divide the internal cavity (55) in a plurality of chambers (60) each of which is expandable in independent way through insertion of a pressurized fluid.
