Abstract (en)

[origin: EP1918438A1] The method involves changing a knitting direction according to formation of edge stitches of a knitted hosiery garment. The edge stitches in a row is enlarged/increased to another row by a transferring process such that the edge stitches have the same size as that of the remaining stitches of the knitted hosiery garment. The stitches in the formed row are transferred to a needle bed and are knitted as needle stitches. Edge areas (12, 12', 13, 13') are formed with needle stitches.
