Abstract (en)  
[origin: EP1918473A2] The system has masonry elements of different sizes and formats provided with panels (1, 2). The panels are attached to spacers (3, 4) by adhesive and binding agents and/or adhesive or binding compounds. The spacers are spaced at a predetermined distance from one another. The spacers are provided between the panels and have a rectangular, oval or polygonal cross section. The spacers extend vertically to a height of the side panels. A seal is provided between edges of the panels. The panels have colored face layers, which include an acrylate. An independent claim is also included for a method of fabricating masonry elements.
