Abstract (en)

Improved wall construction which is provided with panels (2) provided between two rails, whereby every panel (2) is at least provided with two points of rotation (8) with which every panel (2) is provided in the above-mentioned rails such that it can be shifted and rotated, characterised in that every moveable panel (2) is also provided with a pin (9) that can be moved between a first position whereby the pin (9) can be shifted in one of the rails (3 or 4), and a second position whereby the pin (9) is lifted out of the rail (3 or 4), and whereby switching means (16) are provided which automatically move the pin (9) from one position to the other.
