Abstract (en)

[origin: EP1918644A1] The door (1) has an inner side (2) facing the cooking area. A collecting device (6) for the fluid has a longitudinal extension and is attached to the inner side. The door is rotatable around an axis, which runs horizontally or vertically. The collecting device partially delivers the accommodated fluid during closing of the door into the collecting unit. The plate rests in the door against a seal of the cooking area.
