Abstract (en)

[origin: EP1918892A1] There are provided an abnormality reporting device that can generate vibration which can be easily perceived by a driver even when the driver is in a vibrating vehicle during running, and a control program therefore. The abnormality reporting device is equipped with a detector 2 for detecting the state of a driver 10 or the state of a vehicle 20 as a prescribed state when the vehicle 20 is moving, a judging unit 4 for judging on the basis of the detection result of the detector 2 whether it is under an abnormal state, and a vibrating unit 8 for applying vibration of a predetermined vibration pattern to the driver 10 when the abnormality state is judged, and the vibrating unit 8 can apply the vibration while varying the vibration pattern when the abnormality state is continued.
