Abstract (en)
[origin: EP1918899A2] The display (1) has display plates (5, 7) made from flexible material, where each plate has an outer surface and an inner surface. The plates are connected with one another along an area of side edges (9, 11), and spreading units (13) are arranged at a distance to each other between the plates. The spreading units are connected with one another over a common operating device (15) and brought into a spreading position from a resting position over the operating unit, where the plates are depressed apart and bent outwardly in the spreading position.
