Abstract (en)

[origin: WO2007006974A1] The invention concerns a pivoting structure comprising: two bases (2, 3) interconnected through a horizontal pin (6) and at least one horizontal bar (7), first and second frames (8, 12) freely pivoting about the horizontal pin (6), retaining and locking means for maintaining and locking the first and second frames (8, 12) in specific positions relative to each other, and a single fabric (16) for forming either the seat of a deck chair or the lying surface of a hammock depending of the position of the frames (8, 12).
