Abstract (en)

[origin: US2009294250A1] To sort objects, an object is transferred onto a transport device of a sorting plant, and conveyed in accordance with predetermined sort criteria from the transport device to one of a number of outputs of the sorting plant. At the output, the object is transferred to a receptacle assigned to the output. A receptacle is removed from the output as soon as a predetermined fill level has been reached, or no further objects are delivered to the output. An empty receptacle is replaced for the removed receptacle. The empty receptacle is directed via the transport device to the output.
