Abstract (en)

[origin: WO2007022952A1] The invention relates to a housing (1) for a motor vehicle illumination device, comprising a deformable unit that is formed by housing sections (1b, 1c, 1d) and is used for absorbing an external force acting upon the housing. The inventive housing (1) is characterized in that the deformable unit is provided with at least two housing sections (1b, 1c) that enclose an acute angle (a). The invention further relates to a motor vehicle encompassing an illumination device that is fitted with such a housing.
