Abstract (en)

[origin: WO2007025984A1] A racing bicycle brake for front wheels has a brake device (10) for transmitting brake forces to the front wheel. The brake device (10) is connected to the actuating device (45) via a force transmission device (30, 32, 40). According to the invention, the racing bicycle brake is configured as a hydraulic brake, wherein the brake device (10) has two brake discs (26-). The two brake discs (26) are connected in each case on the side to the hub (24) of the front wheel. Furthermore, two brake calipers (12) are provided which are connected in each case to a fork tube (16) and carry the corresponding brake cylinders.
