Abstract (en)
[origin: DE102005041081A1] The device has a handle body, in which the device for a drive of an actuation unit for lock mechanic is supported, where the device is brought into inoperable condition with a pusher (28). The pusher movably stays in connection with a locking device (5) having a remote-controlled electric motor (200). The locking device is accommodated in partial areas of the body, and is designed as module-like and/or cartridge-like and inserted in the body.
