Abstract (en)

[origin: WO2007025557A1] The invention relates to a functional unit (1) for the migration and transformation of data structures from at least one source system (13) into data structures of at least one target system (15) comprising at least one import filter (5) and at least one export filter (7). The at least one import filter (5) is for transformation of a data structure prepared by the source system (13) in a source-system dependent format (17) into a universal description format (18), the at least one export filter (7) is for transformation of the data structure in the universal description format (18) into a target-system dependent format (19) and to provide the same for the target system (15).
