Abstract (en)

[origin: WO2006108865A2] The invention concerns a method for accessing a resource in a computer environment, the resource comprising a set of objects. The invention is characterized in that the computer environment is adapted to store in association with at least one object of said resource at least one modified object, in that said computer environment comprises means for storing in association with such an object information concerning degree of elaboration, and in that it includes the following steps: identifying, for each object of the resource to which corresponds at least one modified object, based on data concerning degree of elaboration, at least one most elaborated version of said object; assembling the objects thus identified for display in the resource. The invention also concerns other methods for accessing to resources as well as resources structured therefor.
