Abstract (en)

A prefabricated reinforced brick panel (1) has a plurality of bricks (2) arranged in a spaced-apart array with mortar (7) between the bricks (2). The array comprises a number of superimposed rows (3) of bricks (2). The bricks (2) in each row (3) are staggered relative to the bricks (2) in each adjacent row (3) of bricks (2). Each brick (2) has a number of vertical through holes (8) extending between a top (9) and a bottom face (10) of the brick (2). These through holes (8) are aligned in the array and vertical reinforcing bars (4) are inserted into the aligned holes (8) and extend between a top (5) and a bottom (6) of the panel (1). Two offset vertical reinforcing bars (4) pass through each brick (2). Transverse reinforcing bars (12) are mounted in the mortar (7) between rows (3) of bricks (2).
