Abstract (en)
[origin: EP1921222A1] The system has tubular posts connected with each other by a horizontal crosspieces and a diagonal crosspiece, and the horizontal crosspieces serve as a support for floor element, where the posts, crosspieces and floor are controllable. The posts have a transversal ring forming a flange with an opening and tubular elements with a stud (32). The horizontal crosspieces have a longitudinal element with a connection unit at each end. The unit is pierced of a channel for passage of a cleat. The cleat permits locking by engagement of one of the openings of the ring.
