Abstract (en)

[origin: WO2007022959A2] The invention relates to a method for treating dust (17) and to devices for carrying out this method. In order to improve disposal with regard to hygiene points of view, the invention provides that the dust (17) is separated in a vacuum cleaner (1) into at least two fractions, which differ in the size and/or mass of the dust particles, and that a dust binding agent (43, 52, 60, 84, 122, 134, 170) is added to a fraction.
