Abstract (en)

[origin: WO2007033400A1] The invention generally provides a method of treating pain in a patient, the method comprising the step of administering to the patient, an effective dose of Methoxyflurane via an inhaler means. Preferably, the patient is a mammal. The patient may be a human or non human mammal. In an especially preferred embodiment, the patient is a human subject. Alternatively, the patient could be a non-human mammal.
