Abstract (en)

[origin: WO2007011698A2] The invention provides synthetically and recombinantly-derived humanized antibody conjugates and related methods, diagnostic assays, reagents, and kits. In one embodiment, the invention provides humanized antibody conjugates comprising a human immunoglobulin fragment which is bound by a cross-linking functional group to a non-human antibody fragment (e.g., a non-human monoclonal antibody fragment) comprising an antigen-binding amino acid sequence.
