Abstract (en)
[origin: WO2007028918A1] The invention concerns a compact multiband antenna consisting of a first dipole type element (1) comprising a first conductive arm (12) connected to a second conductive arm (11) shaped like a housing, mounted on a ground plane (3), the first and second arms being differentially powered (12) and a second slot-type element (2) produced on said ground plane in the extension of said second arm.
