Abstract (en)  
[origin: EP1922954A1] The device has multiple trays (10), sidewalls (20, 30) and rear walls that are assembled together. Two of the trays arranged in parallel on same height, are connected with each other when plug tongues of the sidewall (30), which is formed as an intermediate wall, are engaged into corresponding insertion openings (12) in the two trays in a lockable manner, where the plug tongues project at upper sides and lower sides of the sidewall (30). The sidewalls exhibit frame-shaped strips that are provided with padding.
