Abstract (en)
[origin: EP1923322A1] The closure has a retaining ring (10) and a closure cap that is screwed onto a plugging spout of a bellows portion (18). The bellows portion bears a sealing ring, where a flange (13) of the retaining ring engages over the sealing ring. The retaining ring bears a clip (24) with a grip plate (25). The grip plate is arranged in a clip (24) via two connecting sections extending in a radial direction such that the grip plate stays in a distance to a closure cap in the radial direction. A casing base (22) of the closure cap is spaced apart from an underside of the grip plate.
