Abstract (en)
[origin: EP1923501A1] The container (1) has a body (3) provided with a base wall (31) and a lateral wall (33), and an element (5) forming an inner wall provided with two opposite faces (5A, 5B). The element is connected on a curved part (37) of the body in a detachable manner inside the body in a position or in another position, where the face (5A) is supported against an internal face of the part in the former position. The face (5A) is oriented opposite to the internal face of the part in the latter position, and the element defines a receptacle in the body with the part in the latter position.
